

## **KPI**

- velocity weights done / sprint weight
- code coverage (or maybe path coverage)
- scrum daily bot how you feel / motivation and such

## **Definition of Done (Review specs)**

- Code solves the issue
- Code looks fine / bug free
- Code doesn't break previous code (regression testing)
- Any visual changes are correct with mock to a reasonable degree
- Is there documentation?
- Are there tests?
- All tests pass?
- Does this bring value to our customer?
- Does some part of this not bring value to our customer?
